

# 3HUE Marketing Library

18 documents — the research, the ICP, the words, the identity, the execution plan and the YouTube channel. Every one opens in a browser with no internet connection and nothing installed.

---

Documents: 18      Built: 9 September 2026      Requires: a web browser. Nothing else.

---

## HOW TO USE THIS

Keep the files together in one folder and open `index.html` — this page — by double-clicking it. Every link below opens the document in the same browser window. Works on Windows, macOS, Linux, iOS and Android, online or offline, on a USB stick or in a shared drive.

Each document is a single self-contained file: the fonts are embedded inside it, so a document still reads correctly if you email just that one file to someone. Print or save to PDF from the browser — every document carries a print stylesheet that unrolls the wide tables and drops the sidebar navigation. Finished PDFs of all 18 are in the `pdf/` folder.

## Start here

Read this first — it says what exists, what changed and what is blocking.

### Status & Index

The state of the whole library: the document set in reading order, the core thesis, what changed in the latest pass, the claims that must not be used, the decisions only Andrew can make, and what is still missing.

`00-README-research-status.html` · 133 KB

---

## The research

What the market actually looks like, with sources attached.

### **The Maturity Gap**

Why organisations from small business to enterprise are not maturing on NIST, ISO, SOC 2, ITIL and COBIT. 60+ verified 2024–2026 statistics, and social-listening exhibits with quotes, engagement counts and working links.

maturity-gap.html · 243 KB

### **The Keyword Map**

Search demand for the terms 3HUE could own, and the indexation problems on 3hue.net that stop the company ranking for its own name.

keyword-map.html · 145 KB

---

## **Positioning & messaging**

Who to talk to, what to say, and how it should look.

### **The Forcing Function**

The ICP. Three ranked segments, an interactive 100-point fit scorer with tiers and plays, buying-committee personas, trigger detection signals and disqualifiers.

forcing-function.html · 202 KB

### **The Message Stack**

One approved set of words. Core narrative, positioning statement, three pillars, per-segment messaging, the claims library with substantiation status, objection handling, four battlecards, approved vocabulary and boilerplate.

message-stack.html · 159 KB

### **The Capability Map**

The offer architecture — Snapshot → Build → Operate — and the service pages each call to action lands on.

capability-map.html · 147 KB

### **3HUE Brand Sheet**

The identity. Logo system and sub-marks, colour with WCAG contrast analysis, typography, UI tokens, usage rules, verbal identity and naming conventions, asset inventory.

brand-sheet.html · 418 KB

---

## **Execution**

The things that get built and sent.

### **The Ship List**

The 90-day sequence: questionnaire-teardown lead magnet, ready-to-paste landing page copy, a six-post founder series, a four-touch outreach sequence, an eleven-question discovery script, offer one-pagers and the case-study rebuild spec.

ship-list.html · 160 KB

### **The Handoff**

Reconciles the inherited 2024 marketing strategy and the 2026–2027 GTM deck against the research — where they agree, where they conflict, and how each conflict was resolved.

handoff.html · 147 KB

### **The Marketing Folder**

Where everything lives, and the naming conventions that keep it findable.

marketing-folder.html · 152 KB

---

## **YouTube**

The channel plan and the evidence underneath it.

## The Rollout V3 · LIVE PLAN

Six franchises, the dated 12-week rollout, the one-shoot-nine-assets production model, the linking map back to the site and CRM, the metrics that decide whether it continues, and the decision log.

youtube-rollout.html · 204 KB

## 3HUE YouTube Data Book

The evidence behind The Rollout. Every vidIQ figure consolidated: keyword demand by cluster, 26 channel benchmarks, five video-level deep dives, format rules with confidence ratings, title scores, a corrections log and the stated limits.

youtube-data-book.html · 236 KB

## Research notes

Raw material. Every figure with its source and date — go here to check a number.

### 01 · Company profile

3HUE and AiVRIC as the public sees them: positioning, offer, proof points and gaps.

01-company-profile.html · 128 KB

### 02 · Market data

60+ statistics with source URLs and dates, plus the items that could not be verified.

02-market-data.html · 141 KB

### 03 · Social listening

Every post used, with quote, engagement counts, link and verification status.

03-social-listening.html · 140 KB

### 04 · YouTube channel plan SUPERSEDED

The earlier six-series architecture. Kept for history — work from The Rollout instead.

04-youtube-channel-plan.html · 129 KB

## 05 • YouTube keyword & competitor data

Every vidIQ pull in full, Parts A and B, exactly as the tool returned them.

05-youtube-keyword-competitor-data.html • 144 KB

## 06 • Inherited documents

Notes on the 2024 strategy PDF and the 2026–2027 GTM deck, and the new facts they supplied.

06-inherited-docs-reconciliation.html • 131 KB

Self-contained build. No external stylesheets, scripts, fonts or images – nothing loads from the internet.

Typefaces are embedded, subsetting open-licence (SIL OFL) faces. Four match the originals exactly (IBM Plex Mono, JetBrains Mono, Instrument Sans, Instrument Serif); Sora, IBM Plex Sans, Archivo and Source Serif 4 are set in the nearest available substitutes, so line breaks may differ very slightly from the published web versions.

Sources, dates and substantiation status are carried inside each document. Figures marked “do not use” in The Message Stack are not cleared for external use.
