

Social listening — verified posts and links (captured 2026-09-02)

"Verified" = opened in a logged-in browser pane on Nate's Mac on Sept 2, 2026; quote and counts read off the live page. "Snippet" = search-engine snippet only, not opened. Reddit was blocked in WebFetch and the Claude browser pane, but readable through Nate's Chrome (Claude in Chrome extension) — see Reddit section. TikTok searched logged-in on Nate's account. Browser screenshots could not be exported to files; the evidence trail is quote + link.

Reddit (verified via Chrome, Sept 2 2026) — paraphrased, short quotes only

- r/cybersecurity "10 years of IR work (~1,000 incidents). Here's the security report template that gets clients moving" (Dec 2025, 667 pts, 221 comments)
https://www.reddit.com/r/cybersecurity/comments/1q0g8py/10_years_of_ir_work_1000_incidents_here:
— compliance framing creates false confidence; clients respond to money, not maturity scores ("nobody outside security knows what Level 3 maturity means"); lead with "time to low risk" (months, cost, who, how measured); periphery systems are where orgs die.
Comments: enterprises want "a checkmark as a sales qualification"; "watermelon effect"; clients "go straight to the cost breakdown". Author's NIST CSF exchange: client asks "what's our biggest risk?" after a maturity report.
- r/ITManagers "What are small and mid-size IT teams actually doing for cybersecurity right now?" (Jan 2026)
https://www.reddit.com/r/ITManagers/comments/1qbum9f/what_are_small_and_midsize_it_teams_actu
— 700-user CIO/CISO: "reactionary to compliance checks since 2020", "compliance is a way bigger driver over recognized risk"; 150-person: "70 consultant hours" hard to approve at 200 staff; "bailing out the Titanic with a teaspoon"; 550-person: biggest gap is culture/accountability; one dropped two MSPs, no detection, "we do carry insurance"; "a security MSP is an absolute must".
- r/Compliance "Lost a \$95k deal because we don't have SOC2" (Dec 2025, 43 pts, 70 comments)
https://www.reddit.com/r/Compliance/comments/1pavduq/lost_a_95k_deal_because_we_dont_have_soc
— buyer side: diligence on non-SOC 2 vendor "not worth it"; sending AWS's SOC 2 = blacklist; scope Security TSC only / 6 months / local firm; qualify early; LOI or trust page can unblock; some suspect post is vendor marketing.
- r/smallbusiness "If you're a small business do you start directly with GDPR and SOC2..." (Nov 2025, 113 pts, 40 comments)
https://www.reddit.com/r/smallbusiness/comments/1oucdat/if_youre_a_small_business_do_you_start_d
— founders split; consensus GDPR day one, SOC 2 when a deal is stuck; credible report rarely <\$15K; Type II window <6 months is a red flag; a CEO had chosen Delve pre-scandal.
- r/msp "vCISO" (May 2026, 16/19) <https://www.reddit.com/r/msp/comments/1tdbfjy/vciso/> and "Those offering vCISO... how do you charge?" (Mar 2026, 4/13)
https://www.reddit.com/r/msp/comments/1rkcrb6/those_offering_vciso_or_similar_cyberadjacent/
— price monthly, separate from user count; no blocks of hours; first client question is "can we get away with doing nothing"; SideChannel CEO: bolt-on compliance "doesn't hold up when a client has a real audit, a breach, or a board member who asks the hard questions"; NIST CSF 2.0 + CIS v8.1; tiered retainers (8/16/24 hrs) by size/complexity/compliance burden; sell outcomes not hours; assessment as entry point; many MSPs partner/white-label instead of build; liability: disclaim fiduciary duty, document client risk ownership, insurance. r/vciso exists (small).
- r/sysadmin "Cyber insurance query" (Jan 2026, 11/16)
https://www.reddit.com/r/sysadmin/comments/1pyrgak/cyber_insurance_query/ — don't shade answers; bad faith = denial; insurers cover only declared/conformant systems; "failing to adhere to your own policies is what will get claims denied"; management owns the risk.

- r/ITManagers "Nobody has a good answer yet for how to govern AI coding" (Mar 2026) https://www.reddit.com/r/ITManagers/comments/1rjibp9/nobody_has_a_good_answer_yet_for_how_to_govern_ai_coding/ — 600-person co, 120 devs, "zero governance": no inventory, cost control, or security review; replies: "AI isn't your issue. IT governance is."; "not a technology problem, an organizational one"; nobody names a framework.

TikTok (logged in, Sept 2 2026)

- "SOC 2 compliance" search: first page led by paid partnerships (Rippling w/ @andrewchanvc; Vanta w/ TaxBandits).
